Our investment philosophy and dedicated focus is to assist clients maximise their wealth by paying attention to three important principles:

Optimising returns – through appropriate strategic asset allocation, rigorous security and manager selection and not missing both opportunities and risks;

Minimising risk – through capital protection and loss limitation, by an emphasis on diversification of assets as well as diversification of research and finally through active and real time market monitoring; and

Minimising fees and taxes – through a combination of tax-effective structuring, 'wholesale' investing, 'direct' investing in securities wherever possible, minimising investment fees and through a high level of tax awareness such as imputation credits, tax deferred income, realisation of capital gains and the benefits of long term 'buy and hold' strategies.
